## JPSA Announces Partnership with **AGK-World** in Europe

*Manchester, New Hampshire, USA* – J. P. Sercel Associates Inc. (JPSA) announced that it has appointed AGK-World as their Business Development Consultant to enhance JPSA Laser's presence in the UK, Ireland and Northern Europe.

AGK-World was founded by Alex (AG) Kader, a Business Development veteran with over 28 years in the semiconductor industry. Mr. Kader has extensive experience in equipment sales, business development in IC Assembly & Test and most recently, the emerging green markets of LED and Photovoltaic (PV) manufacturing.

In making the announcement, Rick Slagle, European Sales and Marketing Manager of JPSA, said, "Alex's extensive experience will be vital in our expansion of market leading laser technology for the manufacture of high brightness LEDs and laser patterning or scribing for thin film solar. Furthermore, his network of customers, colleagues and business associates will certainly complement JPSA's commitment to our customers in the UK, Ireland and Northern Europe."

Alex Kader added, "We are excited to partner with JPSA to bring innovative laser solutions for a whole range of applications that depend on very high accuracy, micron precision and high throughput. We are eager to promote JPSA's systems as well as their contract manufacturing services."

AGK-World has headed teams with customers throughout Scandinavia, Europe, Asia Pacific & the Middle East, including Israel. AGK-World's major business strategies focus on core competence, strengthening customer relationship and ensuring customer satisfaction.

JPSA products include UV excimer, DPSS and ultrafast laser micromachining systems, laser beam delivery systems, as well as automation and motion systems. Additionally, JPSA performs contract manufacturing, laser materials processing development and excimer laser refurbishment services.
