

JPSA Announces Partnership with BlueON in Korea

Manchester, New Hampshire, USA – J. P. Sercel Associates Inc. (JPSA) announces that it has signed an agreement with BlueON to represent, sell, and service JPSA laser systems and technology products in Korea. BlueON is a fully integrated sales and service company for LED's and solar industrial equipment and technology.

In making the announcement, Charles E. Cuneo, President of JPSA, said, "BlueON is well-established in Korea as a professional LED's and solar products and services provider to a broad and distinguished customer base. Their 14 years of experience in the LED and solar marketplace will be a tremendous asset to JPSA; we are looking forward to working with them."

BlueON's President, Thomas NJ Cho, adds, "JPSA is a well-known and unique laser technology company worldwide, and as a number one laser solution provider into the LED and solar industry, and we anticipate a long and prosperous partnership. We are very excited to be a part of a team that delivers their own specialized and innovative products and services to their customers; the same way we do. Together, JPSA and BlueON can define our dream, focus on our dream and finally our one dream comes true."

In addition to sales of JPSA systems, BlueON engineers will also service JPSA equipment from their multiple service locations, stock spare parts, and assist customers in operation and process development, as well as provide customer training. BlueON engineers will be traveling to JPSA's Manchester, NH, USA headquarters for in-depth training.

Founded in 1995, BlueON is located in #1355 COT 404 Doojung-Dong, Cheonan-si Chungnam, 330-210 Korea. Their phone numbers are, Tel: +82-41-523-5596 and Fax: +82-41-523-5597

JPSA products and services include UV excimer, DPSS and ultrafast laser micromachining systems, UV and VUV laser beam delivery systems, as well as automation and motion systems. Additionally, JPSA performs contract manufacturing, optical damage testing, laser materials processing development and excimer laser refurbishment services.
