

JPSA Appoints Henry Schoenemann to Laser Refurb Dept. Manager

Manchester, New Hampshire, USA – J. P. Sercel Associates Inc. (JPSA) announces the appointment of Henry Schoenemann to the position of Manager of the Laser Refurbishment Department at JPSA. JPSA offers comprehensive repair and refurbishment services that restore excimer lasers to original factory specifications. Henry will manage JPSA's full laser repair and refurbishment laboratory, services, and inventory of spare parts.

Henry's most recent experience is with Hendrix Wire & Cable where he managed the installation and maintenance of their industrial machinery. He also has experience as an electrical contractor, a Manufacturing Manager, and Principal Manufacturing Engineer. His education includes a BS in Engineering Technology and an AS in Nuclear Engineering.

JPSA products and services include UV excimer, DPSS and ultrafast laser micromachining systems, UV and VUV laser beam delivery systems, UV laser materials processing development, optical damage testing, and excimer laser refurbishment services. JPSA operates a high-performance UV laser job shop as well as a systems engineering and manufacturing business.
