

## Randy Castillo Joins JPSA as Field Service Engineer

*Manchester, New Hampshire, USA* – J. P. Sercel Associates announces the appointment of Randy Castillo to the position of Field Service Engineer.

Randy brings 18 years' experience as a Field Service Engineer in laser and electro-mechanical disciplines. He has previously worked for Honeywell, ESI, Laser Services, and most recently, Laser Advantage. His experience also includes serving as a USMC Communications Specialist and working on Navy sonar systems and systems support. In his new position, Randy's responsibilities will include customer service and response, as well as applications support.

JPSA products and services include UV excimer, DPSS and ultra-fast laser micromachining systems, laser beam delivery systems, laser materials processing development, optical damage testing, and excimer laser refurbishment services. JPSA operates a high-performance laser job shop (UV to IR wavelengths) as well as a systems engineering and manufacturing business.
